On-Target's "Ladies Only" program is designed to create a comfortable experience for women shooters. We find that our novice lady shooters benefit from instruction by a female instructor who caters to the unique needs of women resulting in a more productive learning experience. It is our goal to make each of our ladies SAFE, COMFORTABLE, and ACCURATE with a firearm.

The Introductory Rifle class focuses on safe firearm handling for the beginner student. The goal of this class is to teach the attitude, knowledge and skills necessary for owning and operating a rifle safely. Each \$85.00 class is two hours long and includes all required materials needed to participate in the class (study materials, rifles, ammo and targets) More importantly, the instructor to student ratio is 1 to 3 students—in this way we can be assured that each student will get the necessary attention.

On Targets Secondary Rifle training builds on the foundation of safe firearm handling established in the Introductory Class. Students will learn different shooting positions, improve marksmanship and shoot a number of different rifles in different calibers!

On Target will meet all of your shooting needs. Come shoot with us! You won't be disappointed.
